Meeting Aug 31, 2026 at 18:48 PST

Meeting records Recording

Summary

Project scope defined for academic platform and portfolio development with focus on research quality and timeline.

Platform Scope and Purpose
Project development centers on a personal portfolio and a specialized academic engagement hub. Focus remains on sharing research and scholarly discoveries for specific audiences.

Content Quality and Governance
Research advisors and academic panels must approve all student outputs to ensure content standards. This system restricts postings to academic innovations and professional events.

Timeline and Platform Features
Development will progress in iterative stages targeting completion by the 1st week of November. Advertisements remain limited to relevant academic events such as the CP Garcia event.

Decisions

Aligned

- **Dual-purpose platform vision established** The project goals are defined to encompass a website portfolio for users and a social media-style platform to facilitate academic engagement and research discovery.
- **Research paper publishing criteria defined** The system architecture is established to require specific academic advisor or panel approval for student research papers and outputs before they can be featured.
- **Academic event advertisement feature approved** The platform will include advertisement functionality specifically for showcasing academic events, research colloquiums, and innovation projects rather than general commercial content.
- **Incremental development approach selected** The project development strategy is set to follow an incremental model, progressing from basic system functionality to more complex features.
- **LinkedIn-style visual aesthetic selected** The website's visual design direction is set to mirror the style and interface of LinkedIn from the mid-2000s.

Next steps

- ☐ [Jun Mari Manla] Present design options: Provide multiple appearance options for the academic platform portfolio and social media styles.
- ☐ [The group] Schedule progress reviews: Conduct project progress meetings every 2 weeks until the deadline in the first week of November.

Details

- **Project Scope and Objectives**: Jun Mari Manla confirmed that the project serves two primary goals: developing a personal website portfolio for Bamie Bucog and creating a separate social and academic engagement platform. Bamie Bucog described the vision for this platform as a hub for future academic engagement rather than general social media use.
- **Purpose and Target Audience**: The platform is intended to facilitate academic discourse, specifically for researchers, writers, and bloggers. The discussion established that the platform should focus on the sharing and discussion of recent academic discoveries rather than general content creation.
- **Content Guidelines and Access**: Bamie Bucog emphasized that the platform should be centered on academic innovations and research papers. They noted that the system should include restrictions on content to ensure it effectively serves as a resource for those seeking academic inspiration or ideas, rather than being an open forum for unrestricted posting.
- **Content Approval and Verification**: Regarding the process for posting student research, Bamie Bucog and Jun Mari Manla discussed the need for quality control. They established that research advisors and academic panels must approve papers or student outputs before they are featured on the platform to maintain academic standards.
- **Platform Features - Advertisements**: When discussing additional features, Bamie Bucog clarified that the platform will host advertisements, provided they are relevant to an academic context. These advertisements will be limited to events such as research colloquiums, school innovations, or specific events like the C.P. Garcia event, rather than commercial marketing.
- **Development Strategy and User Base**: The team agreed to develop the system in iterative stages, moving from basic functionality to more complex features. The platform is designed to serve specific user groups, including students, academic peers, and hiring committees.
- **Project Timeline and Progress Reviews**: The team established a meeting cadence where they will review project progress every two weeks. Jun Mari Manla and Bamie Bucog agreed that the target deadline for the project is the first week of November.

- **Design Inspiration**: Bamie Bucog requested that Jun Mari Manla present multiple options for the platform's appearance, aiming for an engaging academic style. Bamie Bucog referenced the design of LinkedIn from the early to mid-2000s as an inspiration for the visual direction of the site.
- **Closing and Documentation**: The meeting concluded with the participants taking screenshots for project documentation. Jun Mari Manla, Bamie Bucog, and THIRBBY ANDREI V. ROLLON expressed mutual appreciation and well-wishes for the future success of the development journey.

You should review Gemini's notes to make sure they're accurate. Get tips and learn how Gemini takes notes

*How is the quality of **these specific notes?** Take a short survey to let us know your feedback, including how helpful the notes were for your needs.*

Actual Q&As

1. What is the main goal of the portfolio website?
   Answer: To serve as a dedicated social media platform and professional networking hub for academic scholars. The platform's primary objectives are to:

- **Host Professional Portfolios:** Enable academics to dynamically showcase their diplomas, awards, certifications, and career milestones.
- **Facilitate Knowledge Sharing:** Provide a free, accessible space for scholars to post published research papers, announce upcoming academic events, and share their latest discoveries.
- **Support Student Researchers:** Allow research advisers to publish and highlight the academic outputs and papers of their students.
- **Foster Academic Engagement:** Build a supportive digital community that helps fellow scholars increase the visibility of their work and connect over shared academic interests.

2. How do you want your content to be presented?
    a. What kind of creative details to add (ex. Adding personal quotes on how the research was made / idealized).
    b. Ideas that can separate yourself from the norm.

Answer: Other than the example on letter A, more details will be added or polished during the next feedback sessions.

3. What are the most important features you want us to develop first (e.g., the public-facing portfolio vs. the private dashboard)?
   Answer: Public facing portfolio

4. How should we categorize and structure (prioritize) your diplomas, awards, certifications, and research papers?
   Answer: The structure should strictly prioritize academic and literary contributions to align with the platform's focus as an interactive research forum. Content should be categorized and prioritized as follows:

   - **Research & Literary Works (Primary Focus):** Published papers, literary outputs, and student research (posted by advisers) should be the most prominent feature on user profiles and the main community feed.

   - **Academic Credentials:** Diplomas and academic degrees should be structured under a dedicated "Academic Background" section to quickly establish the scholar's authority.

   - **Scholarly Achievements:** Awards and certifications should be filtered to highlight academic excellence, research grants, and relevant educational certifications, grouping them in a supplementary "Honors & Awards" section.

5. Are there any extra features you want to add, such as allowing other people to post their papers?
   Answer: Advertising academic events, research colloquiums, and innovation projects

6. Who are the main users of the website (e.g., students, academic peers, hiring committees), and what should they be able to do?
   Answer: Research Advisers - post their student's research paper.
   Other users - Engage with the posted contents.

7. Are you comfortable with us developing the system in small parts (iterations)?
   Answer: Yes.

8. How often would you like to review progress? (Confirms your bi-weekly checking cadence)
   Answer: Bi-weekly.
